

TELEHEALTH COVERAGE POLICIES IN THE TIME OF COVID-19 TO DATE

Timestamp: March 29, 2020 – 5 pm PT

As things rapidly develop regarding what we know about COVID-19, policies around telehealth have also been developing alongside of it. Below is a summary of what is covered by various public and private payers with the information that has been released. Keep in mind that events are evolving and to consider this a living document that could change frequently as new information and new policies become available/are enacted. CCHP will continue to make updates when they become available.

Below is information regarding current policies and the changes made due to passage of [HR 6074](#) and [HR 748](#). HR 748 removed significant sections that HR 6074 had put into law.

MEDICARE FEE FOR SERVICE TELEHEALTH COVERAGE	
SUBJECT AREA	CURRENT POLICY UNDER COVID-19
Location of the Patient	Rural and site limitations are removed. Telehealth services can now be provided regardless of where the enrollee is located geographically and type of site, which allows the home to be an eligible originating site. Existing policies on facility fee prior to COVID-19 changes apply.
Eligible Services	All services that are currently eligible under the Medicare telehealth reimbursement policies are included in this waiver. The list of eligible codes is available HERE .
Eligible Providers	<p>Changes in HR 748 added Federally Qualified Health Centers (FQHCs) and Rural Health Clinics (RHCs) to the list of eligible providers for this emergency period only. <u>The addition of FQHCs and RHCs is not a permanent change to the eligible provider list.</u></p> <ul style="list-style-type: none"> • Physicians • Nurse practitioners • Physician assistants • Nurse-midwives • Clinical nurse specialists • Certified registered nurse anesthetists • Clinical psychologists (CP) • Clinical social workers (CSWs) (NOTE: CPs and CSWs cannot bill Medicare for psychiatric diagnostic interview examinations with medical services or medical evaluation and management services. They cannot bill or get paid for Current Procedural Terminology (CPT) codes 90792, 90833, 90836, and 90838). • Registered dietitians or nutrition professional • FQHCs/RHCs (during the emergency period only)
Modality	HR 748 removed the language HR 6074 put in regarding allowing phone to be used as long as it had an audio/visual component. This change leaves only the currently existing reference in law to “telecommunication systems” and reference to store-and-forward for Hawaii and Alaska as the means of providing telehealth delivered services. There is no definition

	given in law for “telecommunication systems.” The requirement that it be an interactive audio and visual system is in federal regulations. This would mean that CMS theoretically would have flexibility in allowing phone to be a means of delivering services. Until CMS issues more explicit guidance and information, the assumption should be that it will still need to be interactive audio and visual. For other types of eligible services not considered “telehealth” that still use telehealth technologies, see “Other Technology-Enabled Services.”
Out-of-pocket costs/co-pays	Still applies, but the OIG is providing health care providers flexibility to reduce or waive fees.
Prior existing relationship to provide care via telehealth	The pre-existing relationship clause put in by HR 6074 was removed by HR 748.
Home Dialysis Patients	During an emergency period, the Secretary has the power to waive the requirements that home dialysis patients receiving services via telehealth must have a monthly face-to-face, non-telehealth encounter in the first initial three months of home dialysis and after the first initial three months, at least once every three consecutive months.
Hospice	During an emergency period, the Secretary may allow telehealth to meet the requirement that a hospice physician or nurse practitioner must conduct a face-to-face encounter to determine continued eligibility for hospice care.

Other Medicare & Medicaid Policies

EXISTING TELEHEALTH POLICY PRE-COVID-19	POLICY CHANGE IN RESPONSE TO COVID-19	WHAT CAN BE COVERED
MEDICARE		
Licensing		
With the declaration by the President of a national of emergency, the Secretary issued a 1135 Waiver for “requirements that physicians or other health care professionals hold licenses in the state in which they provide services if they have an equivalent license from another state.” Notice here . CMS has not issued guidance on how this will be implemented. Secretary Azar has urged States to consider waiving or relaxing licensing requirements, but action will need to be taken on the state level.		
Medicare Advantage		
Medicare Advantage (MA) plans have the flexibility to have more expansive telehealth policies related to types of services	Medicare Advantage Organizations were informed by CMS that if they wish to expand coverage of telehealth services	MA plans have some flexibility to expand their coverage of telehealth beyond what they currently do. What is covered

covered, where those services can take place (no geographic or site limitations), modality used. Still limits the types of providers reimbursed.	beyond what has already been approved by CMS, they will exercise its enforcement discretion until it is determined that it is no longer necessary in conjunction with the COVID-19 outbreak. (CMS Memo)	will depend on what each plan decides to do. NOTE: MA plans do NOT have to provide these more expansive telehealth services. They are only required to provide what is covered by Fee-for-Service.
Other Technology-Enabled Services		
Virtual Check-In Codes G2010, G2012* Can be done synchronously and asynchronously and telephone can be used	No Change Made	Virtual check-in codes do not have geographic or site restrictions attached so they can be used to engage with patients, but the reimbursement amount for these codes is low and are only meant to act as quick check-ins with patients that do not last more than a few minutes. These codes are also only available for established patients, are patient initiated and cannot result from or lead to an E/M service.
Interprofessional Telephone/Internet/EHR Consultations (eConsult) * 99446, 99447, 99448, 99449, 99451, 99452	No Change Made	eConsult allows a provider-to-provider consultation. Pays both providers, but check definition for the time needed for each code.
Remote monitoring services: * Chronic Care Management Complex Chronic Care Management Transitional Care Management Remote Physiologic Monitoring Principle Care Management	No Change Made	These services are not considered “telehealth” services and were never subject to telehealth limitations. They do have other factors that limit how they can be used so make sure you check the definition for the codes.
Online Digital Evaluation (E- *Visit) – G2061-2063 Online medical Evaluations – 99421-99423	No Changes Made	These services are not considered “telehealth” services and were never subject to telehealth limitations.
MEDICAID		
EXISTING TELEHEALTH POLICY PRE-COVID-19	POLICY CHANGE IN RESPONSE TO COVID-19	WHAT WILL BE COVERED AT THIS TIME
Telehealth reimbursement policies vary from state to state. If the State Medicaid program has managed care, telehealth	A Medicaid FAQ was issued stating that state Medicaid programs have broad authority to utilize telehealth within their	Still developing. Some states have encouraged providers and health plans to utilize telehealth more broadly to provide

reimbursement can vary from plan-to-plan. For Medicaid fee-for-service policies, check CCHP's website .	Medicaid programs including using telehealth or telephonic consultations in place of typical face-to-face requirements when certain conditions are met. States would have to use the Appendix K process for this.	services but for many states the policies continue to be developing as they navigate this situation.

Other Federal Actions

DEA

The declaration of the national emergency enacted one of the exceptions to the Ryan Haight Act for telehealth (telemedicine as it is referred to in the Act).

For as long as the Secretary's designation of a public health emergency remains in effect, DEA-registered practitioners may issue prescriptions for controlled substances to patients for whom they have not conducted an in-person medical evaluation, provided all of the following conditions are met:

- *The prescription is issued for a legitimate medical purpose by a practitioner acting in the usual course of his/her professional practice*
- *The telemedicine communication is conducted using an audio-visual, real-time, two-way interactive communication system.*
- *The practitioner is acting in accordance with applicable Federal and State law.*

<https://www.deadiversion.usdoj.gov/coronavirus.html>

HIPAA

A change was made regarding the Health Insurance Portability and Accountability Act (HIPAA) “Effective immediately, the HHS Office for Civil Rights (OCR) will exercise enforcement discretion and waive penalties for HIPAA violations against health care providers that serve patients in good faith through everyday communications technologies, such as FaceTime or Skype, during the COVID-19 nationwide public health emergency.” <https://www.hhs.gov/hipaa/for-professionals/special-topics/emergency-preparedness/index.html>

OCR Guidance - <https://www.hhs.gov/hipaa/for-professionals/special-topics/emergency-preparedness/notification-enforcement-discretion-telehealth/index.html>

It should be noted that many states do have laws and regulations regarding health information and what is required to protect and secure it. This will likely not impact those state laws and regulations. A separate state action will be necessary.

PRIVATE INSURERS		
EXISTING TELEHEALTH POLICY PRE-COVID-19	POLICY CHANGE IN RESPONSE TO COVID-19	WHAT WILL BE COVERED AT THIS TIME
Coverage varied from payer-to-payer, depending on the plan.	Several health plans have announced that they will make	Still developing. Few details have been given and would

	<p>telehealth more widely available or offering telehealth services for free for a certain period of time. Some of the announcements have come from Aetna, Cigna and BlueShield BlueCross. Additionally, Vice President Pence had announced that he had secured a commitment from the health plans to cover telehealth services, but no details or which plans had agreed were given.</p>	<p>require individuals to inquire with their insurer what is exactly covered. FQHCS/RHCS – How can I use telehealth?

MEDICARE	MEDICAID	PRIVATE PAYER
<p>FQHCs and RHCs can act as both the originating or distant site for telehealth delivered services. Until CMS issues more explicit guidance, they cannot act as the distant and originating site simultaneously as the FQHC/RHC may not be the same location as the Medicare beneficiary. FQHCs/RHCs will NOT be paid the PPS/AIR rate, but instead a methodology to calculate a fee based upon fee-for-service will be created. Additionally, the services that can be provided via telehealth will be the same set of services allowed in fee-for-service (see above). FQHCs and RHCs can utilize some of the technology-enabled services to treat patients such as the virtual check-in and some of the chronic care management codes but not others like eConsult. For these technology-enabled codes, FQHCs and RHCs</p>	<p>This will vary from state-to-state, with some states allowing FQHCs and RHCs to act as distant site providers, and some allowing them to receive their PPS rate, and others not. Some states prohibit FQHCs and RHCs from acting as the distant site provider but may allow them to be originating sites. Other states are silent. Check CCHP’s 50 State Report or your state Medicaid program.</p>	<p>Will vary from payer-to-payer and state-to-state.</p>

will receive a fee-for-service rate, not the PPS rate.
