DEFINITIONS

Last updated 03/25/2024

As used in this subchapter the term—

- Telemedicine means the use of medical information exchanged from one distant site to another via electronic communications to improve, maintain, or assist patients' health status. Videoconferencing, transmission of still images, and e-health including patient centers are all considered part of telemedicine and telehealth.
- Telemedicine services means specialist referral services, patient consultations, remote patient monitoring, medical education, and consumer medical and health information, that are performed as part of a telemedicine

Crisis Intervention Program

The Director with the approval of the Commissioner shall establish Crisis Intervention and Prevention Services. This is a community-based program shall provide counseling, consultation, evaluation, treatment and referral, education, and training services, delivered by a crisis intervention team. The program must be designed for persons with behavioral challenges, mental health disorders or substance use disorders who experience a behavioral crisis that threatens their ability to live a full, productive life due to hospitalizations, law enforcement involvement, or placement in restrictive settings. The Department of Health, Division of Behavioral Health shall support persons in the development of behavioral assessments, individualized behavior treatment plans, and intensive intervention with a focus on family coaching.

The program shall provide the following services:

- Emergency room services. Crisis intervention and psychiatric emergency services based in a hospital emergency room;
- Outreach services. Outreach services and crisis intervention beyond the hospital setting;
- Telephone hot-line services. A community-based telephone crisis intervention hot-line offering 24-hour, 7-days-a-week counseling, consultation, evaluation, treatment and referral services;
- Telehealth Services. Delivery of health care services, through the use of interactive real-time visual and audio or other electronic media for the purpose of consultation and education concerning diagnosis, treatment, care management and self-management of patient's physical and mental health and includes real-time interaction between the patient and the telehealth provider, synchronous encounters, asynchronous encounters, store, and forward transfers and telemonitoring;
- Transportation of persons in crisis to and from the hospital or institution; and
- Suicide Prevention and School Counseling Program: a program in cooperation and coordination with the Department of Education, Department of Human Services, and the Police shall develop a suicide prevention strategy and an evidence-based model suicide prevention program, counseling for bullying, cyberbullying, and peer pressure counseling to be presented in the elementary, junior, middle, and high schools in the Territory which must include the preparation of relevant educational materials that must be distributed in the schools.

Professional Requirements

DEFINITIONS

Last updated 03/25/2024

For Medicine, Surgery, Dentistry, Pharmacy, Nursing and Nurse-Midwifery

Telemedicine means the use of medical information exchanged from one distant site to another via electronic communications to improve, maintain, or assist patients’ health status. Videoconferencing, transmission of still images, and e-health including patient centers are all considered part of telemedicine and telehealth.

Telemedicine services means specialist referral services, patient consultations, remote patient monitoring, medical education, and consumer medical and health information, that are performed as part of a telemedicine procedure.

Telemedicine services agreement” means a cooperative agreement within the Territory or between a hospital or licensed physician in the Territory and one outside the Territory for improved health care delivery, including but not limited to tele-stroke/neurology and tele-radiology, in order to decrease patient and physician travel and enhance inter-facility cooperation.

ONLINE PRESCRIBING

Last updated 03/25/2024

The Board of Medical Examiners shall establish by rules and regulations the requirements for telemedicine licensure in accordance with this subchapter, provided that the rules and regulations include the following: ...

The physician, when examining a patient by telemedicine, shall establish a bona fide physician-patient relationship by:

- Establishing a relationship and coordinating with the patient's Virgin Islands-licensed healthcare professional.
- Establishing a diagnosis through the use of accepted medical practices including, but not limited to, patient history, mental status and appropriate diagnostic and laboratory testing.
- Discussing with the patient any diagnosis as well as the risks and benefits of various treatment options.
- Ensuring the availability for appropriate follow-up care.
- Fulfilling any other requirements as deemed appropriate and necessary by the Board of Medical Examiners.

CROSS-STATE LICENSING

Last updated 03/25/2024

For Medicine, Surgery, Dentistry, Pharmacy, Nursing and Nurse-Midwifery

The Board of Medical Examiners may establish regulations for telemedicine licensure as follows:

The Board of Medical Examiners shall issue a telemedicine license to authorize certain physicians, who hold a full and unrestricted license to practice medicine in another state or territory of the United States, to provide telemedicine services in the Virgin Islands. Telemedicine licenses shall be without private practice rights and without subversion of reciprocity. Any healthcare professional licensed in the Virgin Islands may practice telemedicine without restriction.

The Board of Medical Examiners shall establish by rules and regulations the requirements for telemedicine licensure in accordance with this subchapter, provided that the rules and regulations include the following:

- A physician holding only a telemedicine license under this subchapter shall not open an office in the Virgin Islands, shall not meet with patients in the Virgin Islands, and shall not receive calls from patients in the Virgin Islands.

Source: V.I. Code Title 27, § 45d (2019). (Accessed Mar. 2024).

The Virgin Islands Board of Medical Examiners shall regulate the practice of telemedicine in the Territory in accordance with the provisions of this subchapter and the following:

- No person shall practice or attempt to practice medicine at a distant site between the Virgin Islands and a foreign jurisdiction.
- No person shall practice or attempt to practice medicine at a distant site between the Virgin Islands and another United States jurisdiction without first complying with the provisions of this subchapter and without being a holder, of a Virgin Islands medical license.
- Telemedicine services in the Territory shall operate in accordance with current accepted core standards for telemedicine
